

## Seminar – International Neutron Research for Energy Applications

A special neutron-themed seminar will be held with presentations from three researchers from international neutron facilities. The topics will cover the use of neutron based techniques to investigate energy materials *in situ* or *operando*. This will be a unique opportunity for people interested in using neutrons in their research to talk to international experts and potentially establish collaborations and subsequent access to international facilities. Refreshments supported by the Centre for Neutron Scattering will be available after the seminar so that participants can continue with informal discussions.

Time/Date: 15.15 to 17.00 on 20 May 2019.

Place: Ångström Laboratory, House 2, Ground Floor, Room 2001.

Coffee will be served from 15.00

All are welcome.

### Programme of presentations

<b>Speaker</b>	<b>Title</b>
William Brant	Welcome and Introduction
Marnix Wagemaker	Neutron depth profiling
Gabriel Veith	TBA
Robert Sacci	TBA

Refreshments will be served after the seminar

William Brant

Structural Chemistry
